The shape of your ideas

# Inspiring trends and ideas for your bathroom

Look inside for ideas for your bathroom

HIMACS and the Dutch designer Marike Andeweg introduce four bathroom trends to help you find the style that's right for you. With her expertise and experience in bathroom design and the best solid surface there is something for everyone.

For years, Dutch designer Marike Andeweg has been considered one of the leading trendsetters for bathroom concepts that meet the demands of emotion and function in equal measure. Marike introduces us to some current trends. But first, she explains what she finds so exciting about the bathroom as a living space.

“A bathroom should make you feel at ease. My designs express comfort and beauty.” Marike Andeweg

Marike Andeweg knows how to create exciting objects from subtle colour tones and simple designs.

## A bathroom that fits perfectly is always the result of good thought and professional planning.

Sophisticated details, such as this drip grid, can be easily achieved with HIMACS due to its practical properties.

HIMACS can be combined with other high-quality, haptically pleasant materials.

Marike Andeweg has designed optimal bathroom furniture for years, and has many practical ideas. Marike describes the new role of the bathroom: **“Now that the kitchen is the new living room, the time has come to give the bathroom the attention it deserves.** I would say awareness of the need of a well balanced bathroom, regardless its size is a primary consideration.”

She attributes the change in usage habits to the new role of the shower, which is now an essential component of the bathroom.

When asked about the current trends in the bathroom, Marike Andeweg believes sustainability is a chief concern. So colours should be neutral to ensure longevity. “I suggest light colours such as off-whites, light grey and beige. Generally speaking: people want a low-stimulus environment to start and end the day.”

“Besides being functional, flexible and easy to maintain, products in the bathroom have to be inviting to touch.” Marike Andeweg

Marike Andeweg is a Dutch designer and the founder of the bathroom label Not Only White. She also designs for other brands such as Design On Stock, Eye and Exsta.

After studying Industrial Design Engineering at The Hague University of Applied Sciences, Marike Andeweg started her career in 2002 as a product developer at the Dutch furniture manufacturer Pastoe. In 2003 she co-founded her first brand, where she worked as a creative director for six years. In 2010 she founded Not Only White, specialising in bathroom products for residential and commercial projects. Her designs play with functionality and aesthetics and express a sense of no-nonsense luxury.

Marike has won several international design prizes, including the Red Dot Design Award, iF Design Award and German Design Award. The long-standing creative partnership between Not Only White and HIMACS has produced many successful design pieces.

“I guess flowing water just stimulates the flow in my mind.” Marike Andeweg

Marike relies on natural materials such as wood, clay and linen, and has enjoyed working with HIMACS for many years: “The flexibility to design and produce single unique pieces is great and the colour range of HIMACS is extensive which gives me as a designer a tool to be original and set the right mood. HIMACS is perfect for use in the home.”

HIMACS allows her to create seamless connections and with that the illusion of infinity. And since the bathroom is a space where you have to feel at ease the velvety touch of HIMACS contributes to the feeling of well-being.

The new copper Noon basin.

**Marike sums up her bathroom design experience:**

1. Observe your family's daily bathroom routines and make sure all requirements are met before you start your project.
2. Add a layer of tactility in the material used.
3. Invest in a good lighting plan. Dimmable lights are great for early mornings.

# What design trends inspire the bathroom of today

Say hello to nature in your home!

## Blurring Borders

Life without limits. Indoors or outdoors. In harmony with nature. Mix old and new with high-quality materials.

Make every day feel like a holiday!

## Barefoot Luxury

Consciously choosing to live simply and well leads to high quality. Less is more.

Create a space that positively stimulates your emotions!

## Japandi

Japan meets Scandinavia. Simple forms, clear philosophy, calm and warmth.

Opt for relaxation and concentrate on the essentials!

## Emotional Shades

Our minds need brightness and light. And the essentials: simplicity, function and tradition.

bathroom trend

"Warm grey" tones in various shades of brightness, with a distinctive look and texture, dominate this trend. Concrete and natural stone colours can be combined with warm wood tones, e.g. natural oak. Suitable shades from the HIMACS collection are Santa Ana, Terrazzo Grigio, Alpine White or Maui.

Wall made of HIMACS Terrazzo Grigio

Basin and shelf made of HIMACS Santa Ana

## Open. Natural. Traditional.

All rooms in the home are morphing into multiple use spaces. So the bathroom is no longer simply a bathroom, it is taking over roles that were assigned to living rooms and bedrooms. A sanctuary that requires forms and materials to provide home-iness without compromising the original function.

The human urge for freedom and innovation can be achieved with beautiful furniture and the right materials – alongside an innovative design team.

### HIMACS means the entire wall covering is a seamless, waterproof structure

The striking texture of the Terrazzo Grigio colour is reminiscent of Italian terrazzo: the shelf is also made with HIMACS which is totally waterproof – perfect in a bathroom.

### Even sharp edges feel smooth

Design elements like this bathroom stool can easily be made from HIMACS. The pleasant surface of the material can be machined so that even precise, sharp-edged design is pleasant to the touch.

### A vast HIMACS basin as one entity

With HIMACS, even the most individual ideas can be achieved, as with this angular basin and shelf.

# Simple. Tactile. Authentic.

The feeling of being able to move freely and without constraint is the focus here. It's like taking off your shoes and enjoying life barefoot. The quality of surfaces and materials becomes all important.

Shutters made of HIMACS Sanremo

Sink made of HIMACS Mocha Stone

Naturalness and warmth also determine the ambiance here. Colours from the HIMACS collection, such as Mocha Granite, Crystal Beige, Ivory White or Sanremo, work perfectly.

## HIMACS – uncomplicated chic details with high utility value

Bathrooms need furniture and elements that support practicality with design. Thanks to the **non-porous surface**, objects made of HIMACS are beautiful and tactile, but also hygienic and **easy to clean**.

It is a great art to develop a relaxed atmosphere and to give it spatial expression. As soon as we enter this concrete room we feel we have succeeded in conveying a light, positive attitude to life.

## Hygienic and individual: diagonally positioned shower panels

This permeable shower enclosure is aligned at an angle towards the shower. The floor-to-ceiling panels prevent the bathroom from being splashed with water. At the same time, they provide airiness and a generous feeling of space. The long slats are also hygienic and easy to clean with a damp cloth.

## Achieve any design-idea with HIMACS

It is often the well thought-out details that are most valuable. **Almost any idea** can be planned and achieved with HIMACS. This **long, seamlessly integrated shelf** in the shower wall is one example.

# Japandi – Life finds its sensual place here

# Modest. Contrasting. Crafted.

In a world full of distractions and turmoil, calm and focus in the bathroom are becoming more and more important. That is the core of the Japandi trend.

Wall made of HIMACS Diamond White

Basin made of HIMACS Diamond White

The calming effect of the Japandi trend can be achieved with restrained, yet warm colour tones: contrasts in brightness and structure are ideal. Shades of the HIMACS collection that can be used include Diamond White, Chic Concrete or Ebony Concrete.

## A seamless sink in the bathroom is extremely practical

The transition from the worktop to the basin has no visible join, the result is a flowing unit that is also very easy to maintain.

It is no coincidence that many of the design and style elements from the Japanese and Scandinavian architecture harmonise so perfectly with each other. In both cultures, rooms that radiate peace and relaxation are highly valued.

## HIMACS is the material for many beautiful details

The concave wall cladding looks like tiles, thanks to milled grooves.

The round washbasin made of HIMACS can be integrated into the washbasin with no visible join

## HIMACS can be molded to create wonderfully soft flowing shapes

It can be thermoformed to achieve these style-defining soft lines.

# Emotional Shades – Serenity is essential

# Essential. Functional. Light-filled.

With expert advise from a designer an emotional world can be easily achieved.

Washbasin made of HIMACS Lunar Sand

Luminous base made of HIMACS Opal

This light-filled bathroom has soft tones, combined with discreet lighting to give a positive ambiance. Shades from the HIMACS collection include Urban Concrete, Arctic White, Opal, Cloud Concrete, Aurora Bianca and Lunar Sand.

The central piece of furniture in this dream bathroom radiates lightness and also lends the room serenity.

### HIMACS enables the perfect combination: square basin in rounded washbasin

The contrast of the contours makes the design exciting and beautiful. The basin has been fitted **without any joins**, making it **super-hygienic** and **easy to maintain**.

Rectangular basin CB6033 is made of HIMACS and offers plenty of space

### The artistic use of light is one of the strengths of HIMACS

Light is a decisive factor when it comes to our well-being. HIMACS has a **slight translucency** due to its material composition. Some shades are even more translucent and so are ideal when **backlighting** is desired.

### The material for generous storage areas with a super-soft feel

This washbasin offers spacious storage zones. HIMACS is **"soft to the touch"** on the one hand, and **extremely robust** and **durable** on the other, making it the perfect material.

**Current trends need  
matching colours and a  
wide product range –  
HIMACS offers exactly that**

# The most important colours to set the scene for the new trends

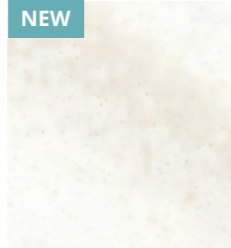

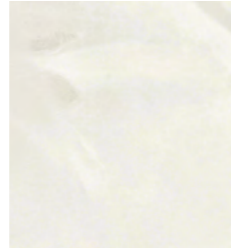

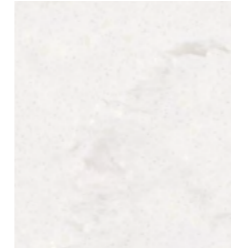

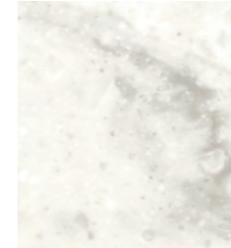

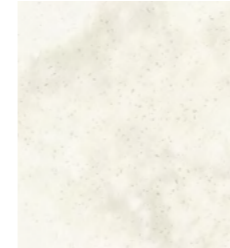

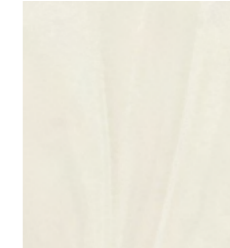

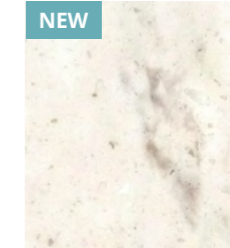

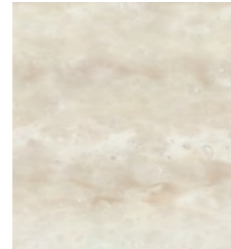

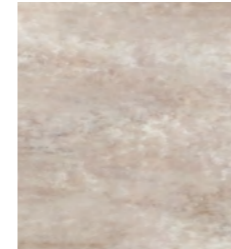

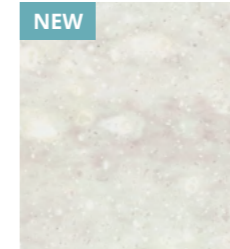

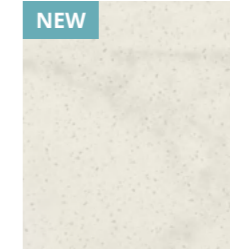

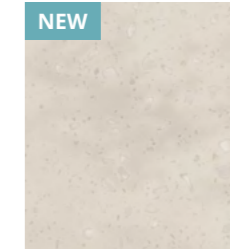

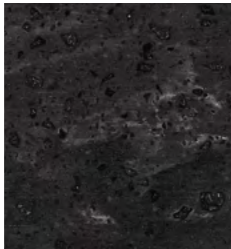

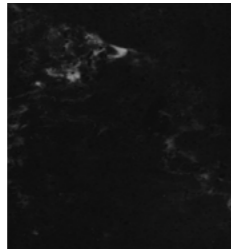

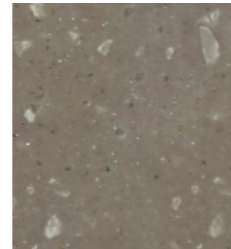

# The HIMACS Aurora & Marmo collection

# Basins. Best design for the bathrooms.

Rectangular or oval, deep or shallow basins, small bathrooms or comprehensive solutions. The HIMACS range offers creative architects and bathroom planner's numerous options.

# Top mount installation

These basins are HIMACS answer to the trend for linear designs. All three basins were exclusively designed as top-mounted bowls. The narrow radius of the two rectangular models creates exceptionally spacious basins.

## HIMACS Unique Models

The HIMACS basins CB4430 comes with a solid surface valve included that is flush with the bottom of the basin

Drain hole valve with solid surface cover is also available and needs to be purchased separately.

**B** suitable for bathrooms

# HIMACS PRM for persons with reduced mobility

The models of the PRM series all have very shallow basins. The special design allows someone in a wheelchair to roll up to the sink and get close, for example.

- The HIMACS basins CB523, CB4232, CB6232, CB5530, CB4628, the HIMACS Top Mounted Basins Collection and the HIMACS Baby Bath are only available without overflow.
- All other HIMACS basins are available with and without overflow.

**H** suitable for healthcare

**B** suitable for bathrooms

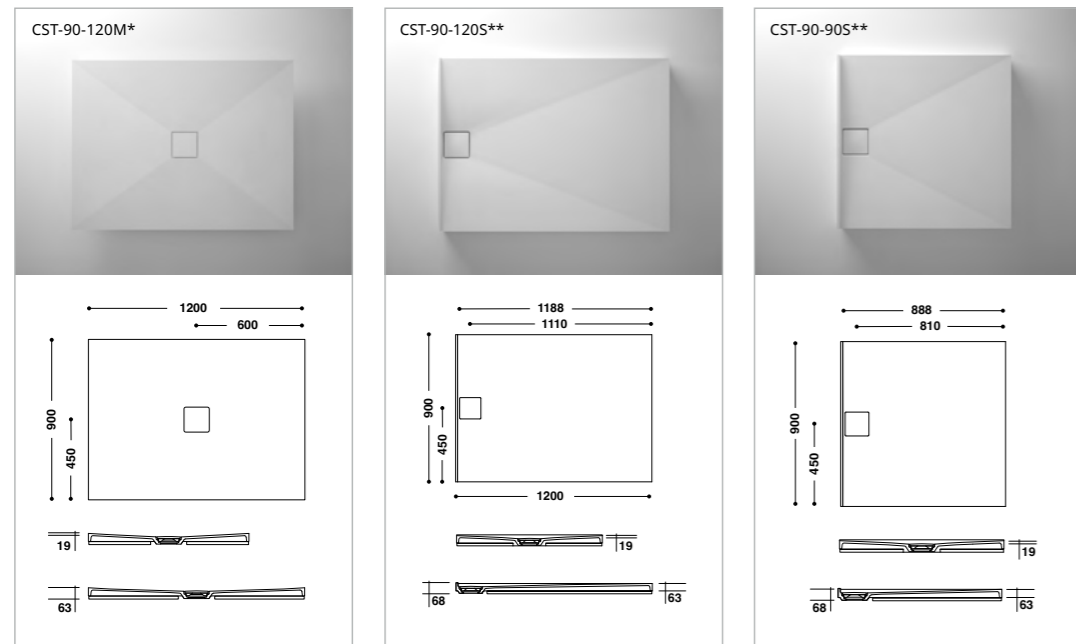

# Shower Trays and Baths made of HIMACS

Click here and discover our complete basins, baths and shower trays range on [lxhausys.com/eu](https://lxhausys.com/eu)

## HIMACS Shower Trays

Three sleek, elegant models expand the possibilities for creative architects and designers to fit out the entire bathroom with HIMACS. The warm, soft-matt feel makes it very pleasant to touch HIMACS directly.

\* Middle Drainhole

\*\* Side Drainhole

\*\* Side Drainhole

## HIMACS Baths

In addition to sinks, the bath is the heart of any bathroom. And now both elements are available in the same material. All baths are designed for integrated installation. Functional benefits of seamless connection: the result is a continuous hygienic surface that is especially easy to maintain.

**Alpine White S028**

HIMACS washbasins, baths and shower trays are available in Alpine White S028.

Warranty: 15 years on all precast HIMACS basins, sinks, baby bath, baths and shower trays.

### Please note:

1. The delivery includes either the bath or shower tray (as shown in the sketch)
2. The matching installation material consisting of height-adjustable feet, a soundinsulating mat and a wooden stabilisation board will be an additional option and can be ordered separately as an accessory.
3. Sheet material is also needed to create the installation seen in the photos.
